Following the publication of “The Roles of Electronic Health Records for Clinical Trials in Low- and Middle-Income Countries: Scoping Review” [1], concerns were raised regarding the author Jiancheng Ye’s rate of self-citation within the article’s reference list. Further investigation into this matter identified that numerous self-citations were added to the manuscript following acceptance of the article without adequate disclosure.

All authors were contacted for a response regarding this matter. Authors Shangzhi Xiong, Tengyi Wang, Jingyi Li, Nan Cheng, Maoyi Tian, and Yang Yang indicated that they were unaware of the addition of references post acceptance. They did not consent to such changes and believed a number of the additions to be irrelevant to the content of the article and requested their removal. Author Jiancheng Ye responded with a scientific justification for each added self-citation within the published article.

Following review of these responses, the JMIR Publications Editorial Office determined that several of the added references were not relevant to the article or were used to support a generic statement where another reference could have been used instead of self-citation. Therefore, the JMIR Publications Editorial Office is issuing this corrigendum to remove the following references:

The JMIR Publications Editorial Office regrets that these issues were not identified prior to publication.

The correction will appear in the online version of the paper on the JMIR Publications website together with the publication of this correction notice. Because this was made after submission to PubMed, PubMed Central, and other full-text repositories, the corrected article has also been resubmitted to those repositories.
